

What is the Queens Future of Energy Business Summit?

The Queens Future of Energy Business Summit will both challenge and identify ways to innovate in a sustainable economy. The summit will consist of exhibitors, speakers, and attendees from every level of NYC businesses. Learn about the latest innovations, incentive programs and best practices from industry leaders from every sector of the energy field.

Why sponsor?

Sponsors will have an opportunity to participate in a meaningful way in making our borough and City more energy efficient, setting new standards, and leading the charge of the Queens Business Community in adapting sustainable energy practices. Your company name and logo will appear on all print and electronic advertisements - including sponsor boards and press releases.

Why exhibit?

Exhibitors will be surrounded by others who are promoting environmentally friendly and energy efficient products and services. Our last event attracted over 1,000 people and by all accounts, exhibitors gained exceptional exposure in the press and community, as well as unprecedented networking opportunities.

Why attend?

Attendees will include key decision makers, government officials, buyers, facility managers, property owners, educators, energy specialists, job seekers, corporation executives, entrepreneurs, eco-experts, and... YOU!

Thursday, February 12, 2015
8:00AM-2:00PM

Queens College
Science Building / Rosenthal Library

Queens Chamber of Commerce
7520 Astoria Blvd #140, Flushing, NY 11370
